1. Introduction

1.1 Purpose of this document

This Interface Functional Specification (IFS) is to provide the agreed baseline of communication requirements and detailed technical specification on shared Training Management System (sTMS) assessment scheduling section.

Assessment scheduling section is used for admin to view and manage assessment scheduling in the CET portal. Only scheduling for standalone exam and remediation exam which will be managed and displayed in this section.

2. Business flow

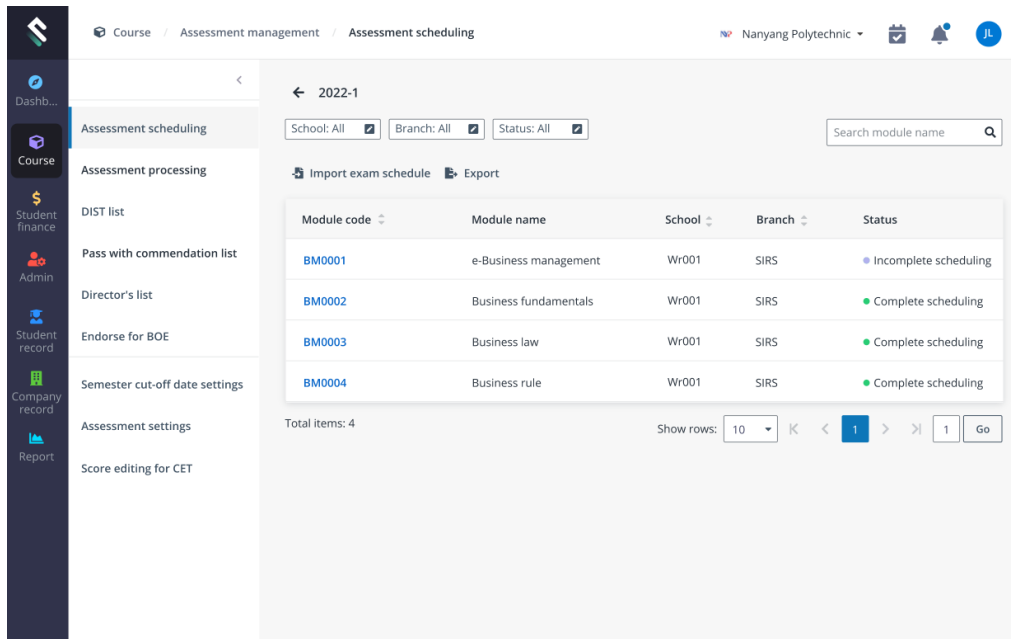

2.1 Exporting module and students info for exam scheduling

Assessment scheduling section is used for admin to view and manage assessment scheduling in the CET portal. Only scheduling for standalone exam and remediation exam which will be managed and displayed in this section.

CET admin can setup the schedule (exam date, exam start time, exam end time, facility, invigilator, teaching type, position id, time entry code) for such sub-component by batch in the assessment scheduling tab with "Import exam schedule" function.

Once a new course intake configuration is completed, a module will be enrolled in this intake. It means CET admin can start the assessment scheduling job for this module.

CET admin should use "Export" first and auto-download the .xlsx file with all the exam schedule information for all the modules under a specific semester. CET admin could follow the "Instruction" sheet in the template to create or update the fields (Refer to [template fields](#) for the details) and import the file into the sTMS.

2.2 Importing exam scheduling information

When the data is imported successfully, exam schedule information will be updated on corresponding table below.

If both the value of "Schedule" and "Seat No." are empty for the "Module code-subcomponent name" sheet in the import file, the student will be assigned "Default schedule" and shown on student list table. Also, the seat No. will be assigned automatically.

Course / Assessment management / Assessment scheduling / Module details

Nanyang Polytechnic

BM0001 - e-Business Management - Final exam

Base score: 100

Weightage(%): 20%

Grade mapping rule: Assessment mapping rule 1

Scheduling status: Draft

+ Add schedule

Schedule name	Facility	Exam date	Start time	End time	Exam duration
Default schedule	Classroom 1	04/05/2022	10:00	11:00	1h

Publish Transfer Cancel exam

Search by student name...

Student name	Student ID	Course intake No.	PDC/MC code	Class
VC Valentin Connelly	A001	NYP-0427-220046	Core 1	Class 1
DL Declan Lehner	A002	NYP-0427-220046	Core 1	Class 1
EG Eulah Glover	A003	NYP-0427-220046	Core 1	Class 2

Upon click the "Publish" button, the scheduling status will be changed to "Published". And all the schedule information will be published to the students. After publishing, the exam schedule still could be updated by import function. Until the exam start time has passed, no adjustments could be done anymore.

If the student list table is empty, (e.g., the course intake has not been published so no student has been enrolled in this module.) the exam scheduling information will be held in the system. If any student is enrolled, default schedule will be assigned to this student and auto published. The exam schedule details will display on the student portal.

3. Interface flat file fields

3.1 Exam Schedule Sheet

Below is the template for import exam schedule and export:

Below are the data fields for exam schedule sheet:

*Some fields are only for export only, any changes done on these columns will not be updated into the system. Listing here for clarification. They will be indicated "Export only" on the 'Remarks' column.

Name	Description	Remarks
Module code*	Module code of the module which the exam belongs to	NP-<String> e.g., NP- MWC01
Module name	Module name of the module which the exam belongs to	Export only
school	School name of the module	Format: String
Sub-component name*	Sub-component name of exam	Format: String
Schedule name*	Individual schedule name	Format: String Enter "Default" for the default schedule
Exam start	Exam date and start time	Format: ddMMyyyy HH:mm
Exam end	Exam date and end time	Format: ddMMyyyy HH:mm
Facility ID	Facility ID	Single value
Invigilator/marker ID	Invigilator/marker ID	multiple value
Candidate No.	Total no. of candidate	Export only
Exam series	Exam series that the module grouped by	Export only

* represents compulsory fields to be sent.

3.2 Workday setting

Below are the data fields for workday setting sheet:

This sheet is only for the integration of workday, listing here for clarification as it is including in the template.

Some fields are only for export only, any changes done on these columns will not be updated into the system. Listing here for clarification. They will be indicated "Export only" on the 'Remarks' column.

Name	Description	Remarks
Module code*	Module code of the module which the exam belongs to	NP- <String> e.g., NP- MWC01
school	School name of the module	String
Sub-component name*	Sub-component name of exam	Format: String
Schedule name*	Individual schedule name	Format: String Enter "Default" for the default schedule
Invigilator/marker ID	Invigilator/marker ID	Format: number
Teaching type	Display the teaching type of the Invigilator/marker	Invigilating/markings
Position ID	Position ID of the Invigilator/marker	Nil
Time entry code	Time entry code of the Invigilator/marker	Nil

* represents compulsory fields to be sent.

3.3 Module code-subcomponent name (Student list)

Below are the data fields for Module code-subcomponent name sheet:

Some fields are only for export only, any changes done on these columns will not be updated into the system. Listing here for clarification. They will be indicated "Export only" on the 'Remarks' column.

Name	Description	Remarks
Student ID*	Student ID	Follow sTMS common: Letter + number e.g., T834561
Student Name	Student name	Export only
Course code	Course code of the intake that student is enrolled	Export only
Course name	Course code of the intake that student is enrolled	Export only

Module code	Module code of the module which the exam belongs to	Export only
Module name	Module name of the module which the exam belongs to	Export only
Course intake code	Course intake code which the student is enrolled	Export only
PDC/MC code	PDC/MC code which the student is enrolled	Export only
Class	Class no. which student is enrolled	Export only
Seat No.	Seat No. assigned to the student	Nil
Schedule name*	Individual schedule name	Format: String Enter "Default" for the default schedule
Exam start	Exam date and start time	Export only
Exam end	Exam date and end time	Export only
Facility ID	Facility ID	Export only

* represents compulsory fields to be sent.

4. Instructions and exception handling

Below are the instructions of import template:

No.	Instructions
1	'Module code', 'School', 'Sub-component Name' must be same value from system.
2	Enter [Default] in 'Schedule name' for default schedule.
3	'Exam start' and 'Exam end' format is 'ddMMyyyy HH:mm'.
4	Other fields not highlighted are for export only.

Exception handling

When the data is imported into sTMS, the system will do validation check. If the data pass the check, it will be updated in system successfully. And the failed data will be skipped.

Upon the import job is done, the result could be in three situations:

- Successfully imported: All the data are successfully imported.
- Partially imported: Some of the data are successfully imported but some are failed imported.
- Failed imported: All the data are failed imported.

All the situations will have a notice and admin can download the report from the link:

 Partially imported the module timetables. You can  [download the report](#) to view details of the import results.

The report will have import result (successful or fail) and details added into original template to describe the reason of failed imported item:

L	M
Import result	Details
Successful
