1. Introduction

1.1 Purpose of This Document

This Interface Functional Specification (IFS) is to provide the agreed baseline of communication requirements and detailed technical specifications between the SaaS shared Training Management System (sTMS) and SP ACCE System for transferring sTMS course intake financial data.

ACCE shall generate corresponding TXT file for course intake finance data, deposit TXT files encrypted by PGP protocol into sTMS SFTP server accordingly. Scheduled job to be implemented by sTMS will pull and utilize the data files and interface with ACCE.

1.2 Intended Audience

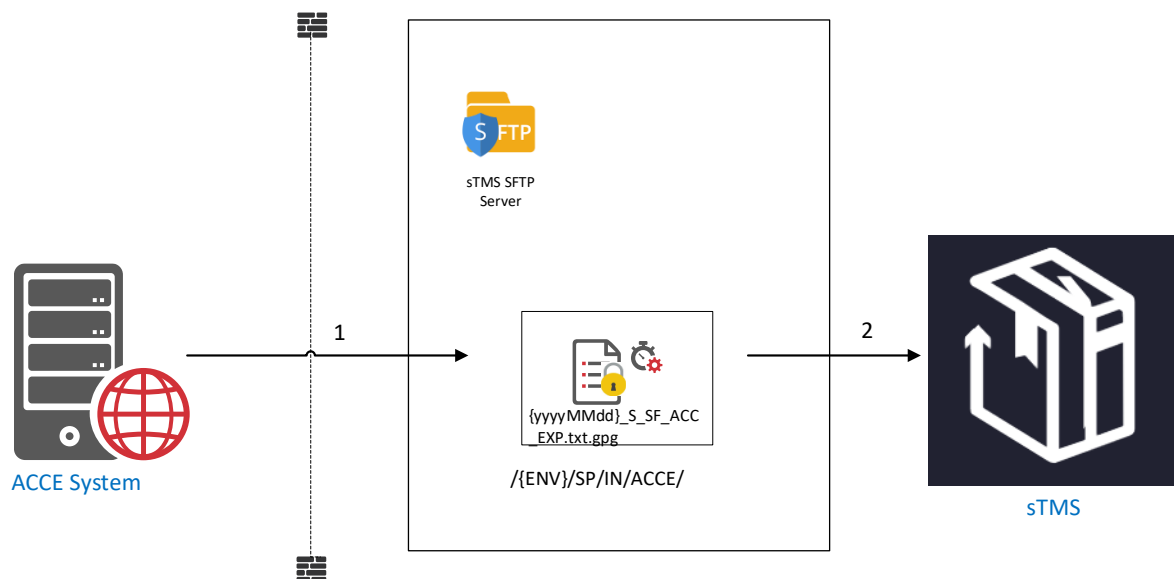

This technical document is used for system communication. Therefore, the intended audiences are the technical stakeholders of shared Training Management System and SP ACCE System.

2. Technical Overview

2.1 System Flow

There are 3 roles involved in the interface diagram.

- **ACCE System:** SP ACCE System.
- **sTMS SFTP Server:** A SFTP server hosted in Azure that stores encrypted files used for data exchange.
- **sTMS:** shared Training Management System.

SN	Description
1	ACCE System schedule job generates course intake financial data into TXT file and deposits to sTMS SFTP server at <code>/ENV/SP/IN/ACCE/</code> .
2	sTMS pull the data file from sTMS SFTP server on a pre-defined schedule job and upload data into database after decrypting the data file.

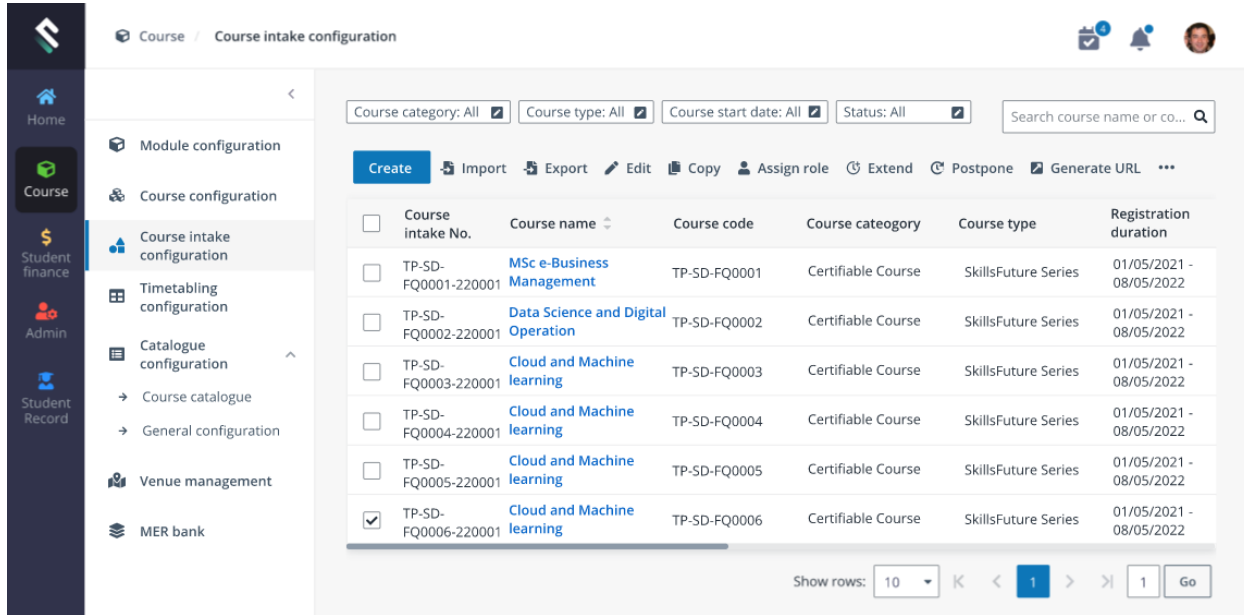

2.2 Interface Design Summary

Interface File Name	{yyyyMMdd}_S_SF_ACC_EXP.txt.gpg
Data Source System	ACCE system
Data Destination System	shared Training Management System
Method	SFTP
File Path	/{ENV}/SP/IN/ACCE/ ENV: UAT, PROD
Encryption Method	PGP
Frequency	Daily Sync
File Transfer Policy	If no data file found in SFTP folder, no records will update into sTMS.
Possible Exception and Exception Handling	• sTMS support team shall be informed by email of the transfer failure. • AP team checks the relevant logs to troubleshoot the cause of the failure.

2.3 Business Rule

Course Intake Number Generation

The users are required to do a course setup on sTMS and followed by Course Intake under the Course intake configuration. The course intake number is autogenerated upon successful creation. Users can retrieve this information via export function, as shown on the illustration below, and to utilize in their respective data fields in ACCE system.
