1. Introduction

1.1 Purpose of this document

This Interface Functional Specification (IFS) is to provide the agreed baseline of communication requirement and detailed technical specification between the SaaS shared Training Management System (sTMS) and Singapore Polytechnic ePACE System for course, module, student information and enrolment information. sTMS shall identify this information and send to SP ePACE System through API provided by SP.

1.2 Intended Audience

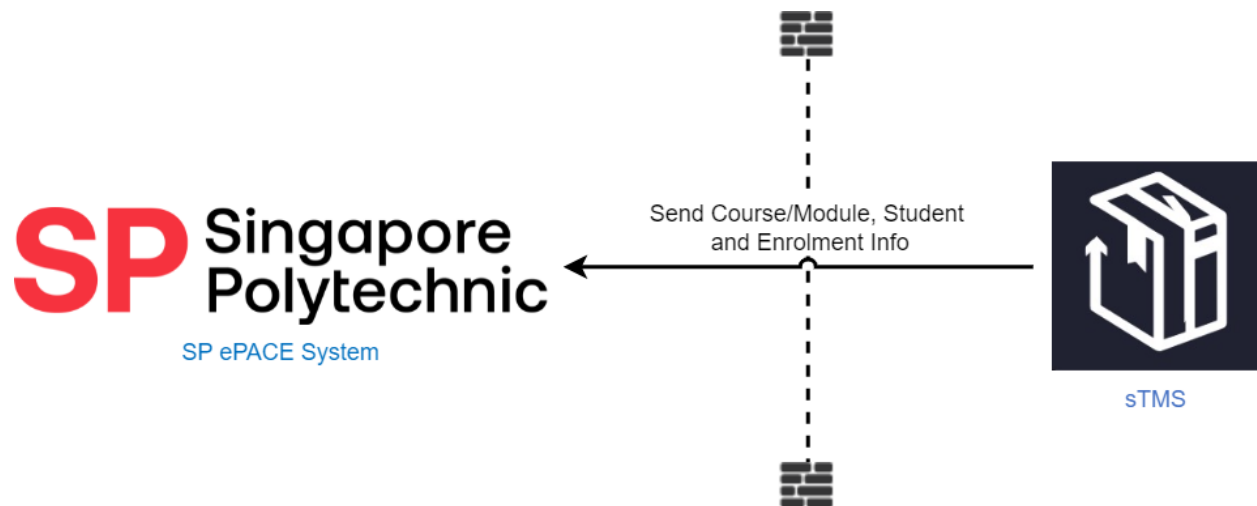

This technical document is used for system communication. Therefore, the intended audiences are the technical stakeholders of both systems.

2. Technical Overview

There are 2 roles involved in the interface diagram.

- **SP ePACE System:** Singapore Polytechnic ePACE System.
- **sTMS:** shared Training Management System.

2.1 System Flow

SN	Description
1	sTMS will send over sessions under course intake, student enrolment information into SP ePACE system.

2.2 Interface Design Summary

Interface Name	sTMS to SP ePACE System
Hosting System	SP ePACE System
Data Source System	shared Training Management System
Data Destination System	SP ePACE System
Mode of Interface	HTTP API
Method	POST
Content-Type	application/json
Authorization	To be provided by SP
Frequency	Daily
Timing	Configurable in sTMS
Encryption Method	HTTPS
Endpoint URL	To be confirmed by SP

2.3 Business Flow

2.3.1 Flow to identify the session of course intake information.

SN	Description
1	sTMS checks for the changes on sessions of course intake information from SP on daily basis.
2	sTMS identifies the creation and updates of the session information updated in CET portal and send to ePACE.
3	sTMS consolidates the delta changes, invoke API to send over the delta data to SP ePACE System.

2.3.2 Flow to identify the student information.

SN	Description
1	sTMS checks for the changes on the student personal information on daily basis.
2	sTMS identifies the changes of students includes personal information updated in student portal. The updates shall be send to ePACE with the following: • Students sync personal and other info from student portal or MyInfo. • Student's personal info updated by CET user manually.
3	sTMS consolidates the delta changes, invoke API to send over the delta data to SP ePACE System.

2.3.3 Flow to identify the student enrolment information.

SN	Description
1	sTMS checks for the changes on the student enrollment information on daily basis.
2	sTMS identifies the changes of students for the given session during the date of checking. The updates shall be sent to ePACE for any new students enrolled on the given module under course intake.
3	sTMS consolidates the delta changes, invoke API to send over the delta data to SP ePACE System.

3. Interface Fields

3.1 Entry Requirements Fields for Session of Course Intake

Field Name	Field Name in sTMS	Data Type	Remarks
CourseID	Course code	String(\$nvarchar(25))	Sample value: SP0073
CourseTitle	Course name	String(\$nvarchar(255))	Display the name of the course
CourseStartDate	Course intake start date	String(\$nvarchar(10))	Sample value: 29032022
CourseEndDate	Course intake end date	String(\$nvarchar(10))	Sample value: 29032022
School	School name	String(\$nvarchar(255))	School name selected in course level.
IntakeNo	Course intake No.	String(\$nvarchar(35))	Format: Course code-[YY] 4 digital running number.
Term	Semester/Term	String(\$nvarchar(255))	Sample value: 2022S1
ModuleID	Module code	String(\$nvarchar(25))	Sample: 504505
ModuleTitle	Module name	String(\$nvarchar(255))	Display the name of the module
IsSendCompletionStatus	NA	Integer(1)	Default to 1
ClassID	Class name	String(\$nvarchar(255))	Display the name of the class
ClassStartDate	Session start date	Date	Sample value: 29032022
ClassEndDate	Session end date	Date	Sample value: 29032022
ClassStartTime	Session start time	Time	Sample value: 154500
ClassEndTime	Session end time	Time	Sample value: 164500

3.2 Entry Requirements Fields for Student

Field name	Field name in sTMS	Data Type	Remarks
User ID	Student ID	String(\$nvarchar(20))	Student ID will follow UAM common ID
NRIC	NRIC/FIN No.	String(\$nvarchar(20))	*Required for MOM report
Name	Name	String(\$nvarchar(255))	Full name of the student
Email	Email address	String(\$nvarchar(255))	User's email account for system login
Mobile No	Mobile number	String(\$nvarchar(20))	The student's mobile number
Dob	Date of birth	Date	DDMMYYYY Required but not shown in profile.
Nationality	Nationality	String(\$nvarchar(20))	The nationality of the student which is sync form Myinfo and need to display in personal page
Gender	Gender	String(\$nvarchar(10))	Gender of the student, should be Male/ Female

3.3 Entry Requirements Fields for Student Enrollment

Field name	Field name in sTMS	Data Type	Remarks
UserID	Student ID	String(\$nvarchar(20))	Student ID will follow UAM common ID
Course ID	Course code	String(\$nvarchar(20))	Display the code of the course
Module ID	Mode code	String(\$nvarchar(20))	Display the code for the module
Term	Semester	String(\$nvarchar(4))	Sample value: 2022S1
ClassID	Class name	String(\$nvarchar(255))	Display the name of the class
Intake No.	Intake No.	String(\$nvarchar(24))	Format: Course code-[YY] 4 digital running number.

4. Appendix

Need SP to provide the API Documentation.
